DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-37 and 64-66, drawn to a nanomechanical device, classified in class 324, subclass 71.4.
- II. Claims 38-63, drawn to a method of forming a nanomechanical device, classified in class 438.

2. The inventions are distinct, each from the other because:

3. Inventions of Group II and Group I are related as process of making and product made.

The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the method of forming nanomechanical devices claimed in Group II is functional to produce any one of a plurality of different nanomechanical devices, including the device claimed in Group I as well as nanobimorphs and nanotubes.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

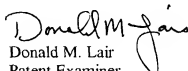

5. A telephone call was made to the Applicant on 11-5-03 to request an oral election to the above restriction requirement, but did not result in an election being made.
